

Evocoil™

Evocoil Benefits & Features

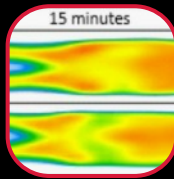

DURABILITY

Evocoil is crafted with stainless steel wire to promote moisture resistance.

A 200,000 cycle durability test was performed with the following results:

- No physical weld breaks occurred during cycle test
- <1% height loss over 200,000 cycles
- <1% firmness loss over 200,000 cycles

TEMPERATURE

When tested against a traditional foam mattress, Evocoil performed 1.5 F° cooler at 10 minutes and 1.25 F° cooler at 15 minutes, just by adding an Evocoil Cover.

PRESSURE

When compared to a traditional foam mattress, there is a 20% plus improvement in pressure relief by just adding an Evocoil Cover.
